The theory of dynamic response of structures is presented in a manner that emphasizes physical insight into the analytical procedures. Structural dynamics theory is applied to conduct parametric studies that bring out several fundamental issues in the earthquake response and design of multistory buildings.

in dynamics but it also occurs in statics in the following sense. When the surface of an object is in contact with a gas, the gas exerts a pressure, that is a force spread over the surface. The pressure is caused by the individual particles of the gas bouncing against the surface and exerting impulsive forces. The magnitude of each force is so ...
