Welcome to Orca Network - Gray Whales

On October 7, 1988, Inupiaq hunter Roy Ahmaogak discovered three gray whales trapped in pack ice in the Beaufort Sea near Point Barrow in the U.S. state of Alaska. The hunter used a chainsaw to attempt cutting a path in the ice leading to open water. Fellow villagers helped the hunter by using water pumps to keep ice from reforming overnight.

Operation Breakthrough - Wikipedia

Robert Busch, author of the book "Gray Whales: Wandering Giants," reports that grays sometime make two passes - one to stir up the mud and a second to sift through the cloud of floating organisms...

PORT WASHINGTON NARROWS: Gray whale still hanging around

In Laguna Beach, California, a beautiful gray whale was spotted cruising among giant seaweeds. Usually, whales swim around seaweed forests, but this one decided to have a little more fun!

Majestic gray whale swims through giant seaweeds

Gray whale strandings highlight importance of increased ocean protection Nestled between the Santa Ynez Mountains and the Channel Islands is an incredible place that is home to the largest animals ever to have roamed the earth.

Gray whale strandings highlight importance of increased ...

The gray whale was present in the northern Atlantic Ocean between the Late Pleistocene and recent times, and C. rhachianecti fossils have been found on a beach in the Netherlands, showing that the barnacle must also have been present. This barnacle has been found between January and March for several years in captive beluga whales in San Diego Bay, near a route used by migratory gray whales. The barnacles have evoked a skin reaction in the beluga whales resulting in the eviction of the ...

Cryptolepas rhachianecti - Wikipedia

Adult grey whales can be as long as 15 metres and weigh up to 35 tonnes. Stack five male African elephants onto a scale and you get the picture. Female grey whales are slightly bigger than males. Newborn grey whales are about five metres long and weigh up to 900 kg—the equivalent of 10 baby elephants. They're usually born toward the end of the southward migration.

Pair Of Gray Whales Wander Into San Francisco Bay - CBS ...

Gray whales leave their homes in the frigid Arctic each winter and make the longest mammalian pilgrimage on Earth, traveling around 6,000 miles to shallow, balmy lagoons along Baja California. Here, the whales give birth to 15-foot long calves before swimming back north, threatened by hungry killer whales along the way.

Where whales mingle with humans | Scienceline

"Every year starting around this time, we do have gray whales wandering into San Francisco Bay and into Tomales Bay," said Mary Jane Schramm of the Greater Farallones National Marine Sanctuary....
