Interview and Book Review: How Google Tests Software

In an article from 2011, InfoQ reports Google's testing department is relatively small for the amount of developers but works well because, like Facebook, every engineer is responsible for their own code's tests. Google's achieved this by creating a culture of testing, and not an abstract, disconnected testing department.

Software Testing Methods: How Google and Facebook Crush ...

Thanks for sharing information about how the TEs add value to Google products. This is the post I have been waiting since you started this series about how Google tests software. I am trying to build a team of software quality assurance people and the skills set of a Google's TE is what I am looking for in the people I hire.

Google Testing Blog: How Google Tests Software - Part Seven

User focused testing is the job of the Google TE. Assuming that the SWEs and SETs performed module and feature level testing adequately, the next task is to understand how well this collection of executable code and data works together to satisfy the needs of the user. TEs act as a double-check on the diligence of the developers.

Google Testing Blog: How Google Tests Software - Part Two

78 How Google Tests Software The insight and leadership required to perform the TE job successfully means that many of the top test managers in the company come from the TE ranks. There is fluidity to the work of a Google TE that belies any prescriptive process for engagement. TEs can enter a project at any point and must

How Google Tests Software

How Google Tests Software ()

Software Testing is a Focus, Not a Team. As Google's team grew, software engineers building and testing their own didn't scale. Instead of rolling out a more traditional testing team, Google started creating specialized engineering roles to help boost the organization's QA bandwidth holistically.

What Growing Teams Can Learn about QA from How Google ...

NOTES: Chapter 5: Improving How Google Tests Software. SUMMARY: A very short chapter, almost self-deprecating. Talks about fatal flaws in their process (not keen on the separation between test and development), the future of the SET role (they feel it will go away), the future of the TE (move to more specialized roles).
