Swing into a spraying pass and squeeze the trigger as you continue to move the gun parallel to the house surface. Start the spray job in an inconspicuous area of the house if possible. Make sure the spray gun is sweeping across the project in a constant motion BEFORE pulling the trigger.

How to Paint using an Airless Sprayer - Extreme How To

The first step to a proper re-spray is removing all the little bits of trim, emblems, and non-painted parts. Some things you can tape around like windows and window gaskets (you will likely end up with a tapeline, so be aware), but taping around bumpers, emblems and door handles is just dumb, don't do it.

10 Car Paint Prep Tips - NAPA Auto Parts

Sanding and Applying Primer With the rust removed, sand the entire surface to smooth out uneven areas and dull the surface so the primer and paint can adhere. Start with 120-grit sandpaper and work to finer grade sandpapers, ending with 320-grit. For large, flat surfaces, use a sanding block to get even pressure.

How to Prepare Metal Surfaces for Painting | Hunker

Start with the cabinet frames, using a high-quality brush for smaller areas and a foam roller for larger surfaces. The technique is the same as for the primer — use even strokes with the brush and finish the stroke back into the wet paint and feather out the edges. Also, remember to lay off after the surface has been painted. Step 2
