Exercise 8.4: For this problem, you will need to use an array of objects. The objects belong to the class MovingBall, which I have already written. You can find the source code for this class in the file MovingBall.java. A MovingBall represents a circle that has an associated color, radius, direction, and speed. It is restricted to moving in a rectangle in the (x,y) plane.

## **Java Programming Introduction - Chapter 8 Exercises**

This is an introduction to Java programming course that consist of over 2 hours of video lectures, 32 quizzes and 8 coding exercises. You do not need any programming experience. I will walk you step by step toward the projects. Starting by installing the required software JDK and Eclipse.

Exercise 10.3: Section 8.4 presented a PhoneDirectory class as an example. A PhoneDirectory holds a list of names and associated phone numbers. But a phone directory is pretty useless unless the data in the directory can be saved permanently -- that is, in a file. Write a phone directory program that keeps its list of names and phone numbers in a file.
