### **How Technology Will Affect the Future of Knowledge ...**

Knowledge is a key building block of change management. If you want to drive a change, you need to help build the knowledge that individuals need to make the change. Individuals need two types of knowledge: 1) how to change during the transition, and 2) how to perform effectively in the future state. Keep in mind that knowledge is only effective if there is already awareness and desire to make the change.

## **Why Knowledge Management Is Important To The Success Of ...**

Gilbert argues that in a knowledge society, there has been a shift in valuing applied knowledge over academic knowledge in the broader society, but this has not been recognised or accepted in education (and particularly the school system). She sees academic knowledge as associated with narrow disciplines such as mathematics and philosophy, whereas applied knowledge is knowing how to do things, and hence by definition tends to be multi-disciplinary.
