Lean Maintenance For Lean Manufacturing

In Lean Manufacturing the cost of a single machine going down for maintenance is multiplied by the number of machines in that cell. With no parts in inventory, a single machine going down results in no parts shipped. Broken delivery schedules that cannot be made up, if the next parts made are "just-in-time."

Lean Maintenance for Lean Manufacturing

Lean Maintenance is a key ingredient to a successful Lean Manufacturing environment. Lean Manufacturing seeks to cut out three types of waste: Processes that do not add value for the customer; Inefficiencies in processes; Variations in the pace of production. The latter concept is "mura" or "unevenness". If an employee's work day is divided between being idle for five minutes and working frantically for ten, then her workload should be smoothed out so she can work steadily all day.
