The reed petals in 2 stroke OUTBOARD engines take an incredible amount of abuse! At peak RPM reed petals are opening and closing hundreds of times per second. Over time, a single reed loses its ability to regulate flow rates in proper proportions. This causes a loss of reed petal reaction and reduces the consistency of peak horsepower.

The difference in stiffness between the top reed and the bottom reed allow the reeds to respond quickly and accurately to changes in engine pressure. This translates into quicker acceleration, crisper throttle response and increased horsepower throughout the powerband. "I installed a set of your reeds in my son's Yamaha outboard.

Power Reed Valves for Outboard engines - Bob's Machine

The condition of your reeds in a 2 stroke outboard is indeed very critical to proper running quality and performance. If a reed is broken, fractured, or missing...it is like having a hole in your engine...and fuel cannot be properly delivered to the affected cylinder. It is most noticeable at idle and low speed.

Reed Valves: Signs of Problems - Moderated Discussion Areas
