Top 10 Best Split Air Conditioners As Of October, 2020

A split air conditioner is composed of two separate units, a condensing unit and an evaporative coil (known as a "condenser," and a "coil" respectively in short-hand or slang). It is from these two separate units that a split air conditioner gets its name. These units are joined by a set of copper tubing known as a "line-set," which transfers refrigerant from one unit to another.

What is a Split Air Conditioner? Split vs Packaged AC Units

A split air conditioner consists of an outdoor unit and an indoor unit. The outdoor unit is installed on or near the exterior wall of the room that you wish to cool. This unit houses the compressor, condenser coil and the expansion coil or capillary tubing. The sleek-looking indoor unit contains the cooling coil, a long blower and an air filter.

What is a Split Air Conditioner System? | Networx

Traditional central air conditioning is not always the best fit for every home. If you have an older home, installing whole-home air conditioning may not be possible due to lack of space for ductwork. Fortunately, there's a popular, flexible solution: ductless heating and cooling units, known as ductless mini split air conditioners.
