Problem 1 We have  $-1 \cdot 125 - 2/3 = (-125) 2/3 = 125 = 52 = 25$ . Problem 2 We travel a 6 feet in  $t$  seconds at a speed of  $v = a$  6r feet per second. If we do this for three minuets or  $3(60) = 180$  seconds the we travel a 6r (180) =  $30a$  r. feet. To convert this to yards we divide by 3 to get at total length of  $10a$  r. yards. Problem 3 One way to ...

### TheContestProblemBooks: AnnualHighSchoolMathematicsContests

The contest books contain fine counterexamples but, more than that, if the task is to find several solutions to a problem, then even the more routine problems may form a starting point for en engaging activity. The site contains several examples of solved problems from the contest: Two Cevians and Proportions in a Triangle (#37, 1965)

### The Contest Problem Book I-IV

xiThe Contest Problem Book VI Any experienced teacher knows that test questions thought to be easy can actually be quite challenging for the students, and vice versa. Each misjudgement of the difficulty of one of the 30 AHSME questions usually affects the number of honor roll students by a factor of 2.
