Javascript. Over the last week I've gradually come to the realization that the fundamental reason why most people have trouble with JavaScript is because it doesn't fit their mental model of how programming should be done. This isn't to say that most programmers don't manage to achieve their end goal.

Logic in programming is a fundamental key to be a good developer. Maybe, depending of your job place you are going to use more algorithms or not. If you are a web designer probably you are not going to deal with complex algorithms, but if you are front-end developer maybe a little more and if you are a back-end developer much more.

5 points to improve your programming logic | Hacker Noon
